# Where the job can take you

# How to be a medical writer

## 1. Research the therapy area, covering:

- o The disease
- o The available therapies
- o Key trials and clinical data (own compound)
- o Key trials and clinical data (other compounds)
- o Who's saying what about which therapies

## 2. Consider all of the information available, including:

- o The client's brief
- o The views of the opinion leaders
- o The target audience
- o Effective and appropriate communication vehicles
- o The scientific evidence

## 3. Write scientifically accurate, beautifully crafted editorial, such as:

- o Educational documents that stand up to peer review
- o Promotional materials that present complex data in fresh and engaging ways
- o Persuasive, attention-grabbing copy

# Why is clear communication important?

- o The doctor examined the patient after removing his trousers

# Why is clear communication important?

- o People who live in cities see up to 5,000 marketing messages every day

Estimate based on US survey including 4,110 people conducted by Yankelovich market research company. Reported in the New York Times, 15 Jan, 2007.

# Common characteristics of a medical writer in no particular order

- o Scientist (often has a PhD and post-docs)
- o Enjoys writing
- o Pedantic
- o Usually has a favourite punctuation mark, a preferred font and a customised bullet point
- o Good listener – able to communicate someone else's opinion
- o Excellent research and analysis skills
- o Likes statistics

# A day in the life of a lead writer

Opinion leaders

Puscurool® works fast *in vitro*  
The early data are impressive  
But mention the nausea

Medical writer

Pharmaceutical client

Puscurool® is better than Scabitel®  
Can you get published by August?

Phew: the writer has  
read the literature  
(done my homework!)
